Mar del Plata, Argentina

PROFESSIONAL PROFILE

Junior Full-Stack Developer, graduating with a Technical Degree in Programming from UTN at the end of 2026. I build web applications with Java, Spring Boot, and Angular: RESTful APIs, authentication with Spring Security and JWT, and persistence with Spring Data JPA and Hibernate. I work with advanced SQL and relational database modeling. I freelance and co-founded the RES.dev agency. Fluent English (C1). Focused on clean code, good practices, and continuous learning.

EXPERIENCE

Freelance Full-Stack Developer – PTDE, School of Psychology (UNMdP)

- October 2026 – Present. Technologies: Angular 22, Spring Boot 4, PostgreSQL, Flyway, Docker.
- Developing a teaching-plan management system on my own, from back end to front end.
- Workflow for submitting, auditing, and approving plans, with read access for students.
- Role-based authentication with JWT and PDF generation.

Intern – IPSIBAT, Institute of Basic, Applied and Technological Psychology (CONICET – UNMdP)

- November 2026 – Present. AI assistant (Claude API) over PostgreSQL, with roles and sensitive data.
- Updating the institutional website (WordPress) and integrating it with Instagram.

Co-founder and Developer – RES.dev

- Web development agency: built the landing page and handle client contact.

EDUCATION / PROJECTS

Technical Degree in Programming

- Universidad Tecnológica Nacional (UTN) | 2024 – Present (Expected completion: December 2026)
- Status: In the final term, with all final exams up to date (2024 curriculum).
- Key coursework: Programming I, II, and III (Java, C), Databases I and II (relational modeling, triggers, CTEs, transactions, views, data warehouse), Systems Methodology, Software Development Management, Business Organization, Mathematics, and Statistics.

Restaurant Reservation Management ("Foodies") (Thesis Project)

- Technologies: Java 21, Spring Boot, Spring Security, JWT, Spring Data JPA, MySQL, Angular 22, Chart.js, Git, Postman.
- GitHub repositories: github.com/Romma711/foodies | github.com/Romma711/foodies-front
- Team project with three people, across back end and front end, using Scrum.
- RESTful API to manage users, restaurants, and reservations, with role-based access control.
- Persistence of complex relationships with Spring Data JPA and Hibernate.
- Angular front end with reservations, reviews, and an admin dashboard with metrics.

TECHNICAL SKILLS

- Languages: Java, TypeScript, JavaScript, SQL, C, HTML5/CSS3.
- Frameworks & ORM: Spring Boot, Spring Security, Spring Data JPA, Hibernate, Angular.
- Databases: PostgreSQL, MySQL, SQL Server, triggers, CTEs, transactions, views, data warehouse.
- Tools & Methods: Git, GitHub, Docker, Flyway, Postman, JWT, Scrum / Agile.
- AI-assisted development: Claude Code, agents, and MCP, with specification, planning, and review of generated code.

LANGUAGES & SOFT SKILLS

- English: Advanced / Fluent (C1) – Professional conversation, technical reading, and fluent writing. Spanish: Native.
- Soft skills: Teamwork, analytical problem solving, initiative, adaptability to agile methods (Scrum), clear communication.
